

Fortune 300 Leading Insurance Provider

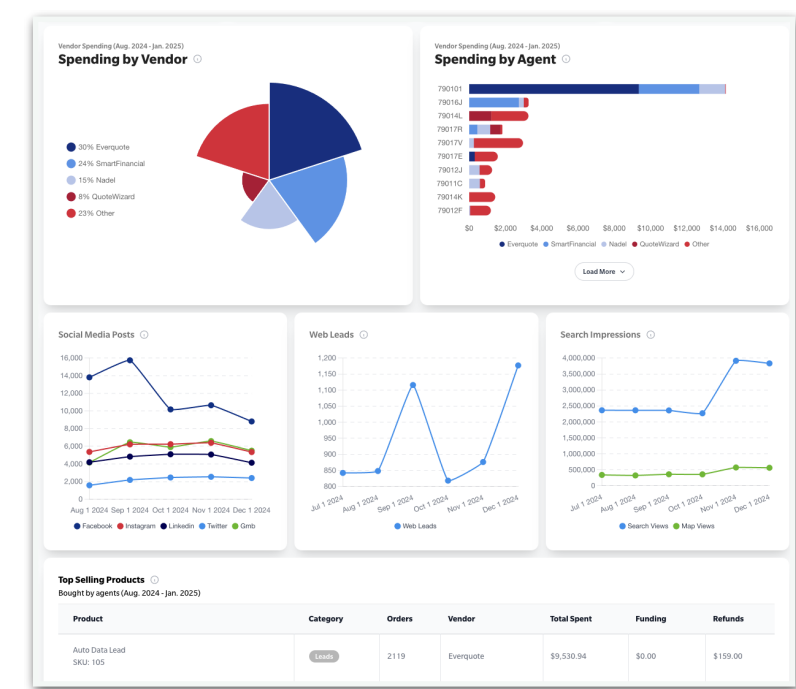

In 2021, we partnered with a leading national insurance provider to support their extensive network of 10,000+ agents and district managers.

In the ever-changing insurance landscape, where trust and connection are paramount, empowering a large agent network with the right tools and resources is essential. That's why Cooperate was entrusted to design, launch and manage a state-of-the-art platform tailored to their specific needs, integrated into their existing systems yet expanding their capabilities to provide greater support to the broad agent network.

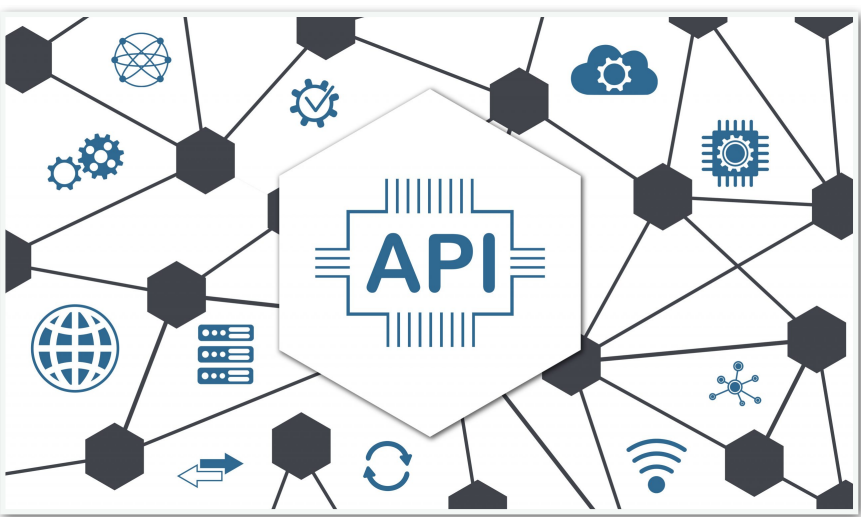

The platform offers a comprehensive suite of features to its users and our commitment to the brand is about more than just our platform; it's about forging a partnership that adapts and grows with their agent-network's unique needs, ensuring they are empowered to succeed in a dynamic, fast-paced industry.
